PCT/JP2004/011329

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:  
(See extra sheet.)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

Continuation of Box No.III of continuation of first sheet (2)

The invention according to claim 1 relating to "a medicinal composition for treating or diagnosing an inflammatory disease containing sugar chain-modified liposomes in which a sugar chain is bonded to liposome membrane" and the invention according to claim 42 relating to "a medicinal composition for treating or diagnosing an inflammatory disease containing liposomes in which liposome membrane is made hydrophilic and no sugar chain is bonded to the surface" are common to each other in "using liposomes in treating inflammation".

However, this constitution has been publicly known as reported in the following document. Thus, there is no relevancy involving any special technical feature between them.

Such being the case, these inventions cannot be considered as a group of inventions so linked as to form a single general inventive concept.
